

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): A pressure sensitive adhesive composition which comprises the following components (A), (B) and (C):  
  
(A) ~~A<sub>nan</sub>~~ oxyalkylene polymer containing 0.3 to 0.7 equivalent of a hydrolyzable silyl group in each molecule and having a number average molecular weight of 20,000 to 50,000 (hereinafter, "hydrolyzable silyl group-containing polymer");  
  
(B) ~~A<sub>a</sub>~~ tackifier resin;  
  
(C) ~~A<sub>a</sub>~~ curing catalyst;  
  
wherein the compounding ratio of the tackifier resin (B) is 5 to 80 parts by weight per 100 parts by weight of the polymer (A).
2. (original): The pressure sensitive adhesive composition according to Claim 1 wherein the Mw/Mn (molecular weight distribution) of the hydrolyzable silyl group-containing polymer (A) is not wider than 1.6.
3. (canceled).
4. (currently amended): The pressure sensitive adhesive composition according to Claim 1

wherein the hydrolyzable silyl group in the hydrolyzable silyl group-containing polymer (A) is represented by the following general formula (I);

(wherein,  $\text{R}^2$  represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

5. (canceled).

6. (currently amended): The pressure sensitive adhesive composition according to Claim 2

wherein the hydrolyzable silyl group in the hydrolyzable silyl group-containing polymer (A) is represented by the following general formula (I);

(wherein,  $\text{R}^2$  represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

7. (currently amended): The pressure sensitive adhesive composition according to Claim 3

wherein the hydrolyzable silyl group in the hydrolyzable silyl group-containing polymer (A) is represented by the following general formula (I);

(wherein,  $\text{R}^2$  represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

8. (canceled).
